

Journal of Risk and Insurance

2017 Editor Report

Print version of the Report Presented to the ARIA Board August 2017

1. Submission and Publication Statistics.

The *Journal* continues to have a healthy flow of submissions, with 82 new submissions during the first six months of 2017, which compares favorably to the 185 new submissions received during the 2016 calendar year. In terms of backlog, the *Journal* currently has 69 articles that have been accepted for publication, but have not yet appeared in the print edition. Eight of these articles are scheduled to appear in the September 2017 issue of the *Journal*, leaving a net backlog of 61 accepted articles. The status of the accepted papers is described in the following table.

Posted on Early View	In Production	In Proofing	In Editorial Office	Total Accepted
63	4	2	0	69

As noted in previous reports, due to a server failure in August 2012 the manuscripts submitted prior to January 1, 2013 were handled as paper files with correspondence by email. The statistics that follow do not include these legacy manuscripts.

Since we implemented ScholarOne for new submissions in January of 2013, we have processed 824 new submissions, the disposition of which is described in the following table.

Disposition of Original Submissions: January 1, 2013 - June 30, 2017

Accept	Minor Revision	Major Revision	Reject After Review	Desk Reject	Under Review	Total
1	21	199	375	194	34	824

Of the 790 original submissions for which an initial decision has been made, the average time required to reach that decision is provided in the next table.

Original Submissions: Time to First Decision

	Accept	Major Revision	Minor Revision	Reject After Review	Desk Reject	Total
Number	1	199	21	375	194	790
Percentage	.1%	25.2%	2.7%	47.5%	24.6%	100%
Days to Decision	0	123.83	111.86	109.15	34.64	N/A

The ScholarOne web portal has also been used to process revised manuscripts of papers submitted since January 2013, some of which have been revised several times. The disposition of these revised manuscripts is described in the following table.

Disposition of Revised Manuscripts: January 1, 2013 - June 30, 2017¹

Accepted	Minor Revision	Major Revision	Reject	Under Review	Total
121	108	69	31	12	341

Given that there have been 824 new submissions since January of 2013, and during that time 569 manuscripts were rejected after the first decision and 31 were ultimately rejected after revision, the *Journal's* rejection rate is approximately 73%.²

Of the 329 revised manuscripts received by the Editorial Office through ScholarOne for which a decision has been reached, the average time required to reach that decision is contained in the following table.

Revised Manuscripts: Time to Decision

	Accept	Major Revision	Minor Revision	Reject	Total
Number	121	69	108	31	329
Percentage	36.8%	21.0%	32.8%	9.4%	100%
Days to Decision	30.30	88.41	78.06	105.58	N/A

¹ Note that some manuscripts appear in this table several times, for example as another major revision, a minor revision, and an ultimate acceptance or rejection.

² Since 34 of the 824 new submissions are still under review, the 73% can be viewed as the minimum rejection rate.

Finally, the *Journal* has, since the beginning of 2013, received new submissions from corresponding authors in 53 countries. Submissions from the United States accounted for 33.1% of this number, followed by Germany (9.6%), Taiwan (8.5%) and Canada (5.2%). A complete listing is contained in Appendix A.

2. Impact Assessment

The impact factor, produced by the Journal Citation Reports of the Institute for Scientific Information, is the most frequently used measure of journal quality. The 2016 two-year impact factor is calculated by dividing the number of citations in 2016 of articles published in the *JRI* in 2014 and 2015 by the total number of articles published in 2014 and 2015. The 2016 impact factor is 1.343, a slight decrease from the corresponding 2015 impact factor of 1.535. The 2016 five-year impact factor is 1.882, a slight increase from the corresponding 2015 five-year impact factor of 1.747.

In terms of citation rankings, the *Journal* was in 2016 ranked 38/96 amongst business and finance journals (as compared to 23/94 in 2015), and 109/347 in economics journals (whereas the 2015 ranking was 83/334).

According to the *Wiley-Blackwell Publisher's Report 2016*, the number of full text downloads for the *JRI* from the Wiley Online Library and 3rd parties during 2016 has increased by 16%. This total includes usage on Wiley Online Library, EBSCO and other third-party databases.

Currently, 1,287 individuals are registered to receive automatic content alerts, which is a 1.4% increase over 2015.

From July 1, 2016 to June 30, 2017, there were 2994 page views and 546 full paper downloads from the IDEAS (RePEc) web site, as compared to 3048 and 527, respectively, in the previous 12 months.

All articles published in the *Journal* are automatically uploaded to the IDEAS website (located at <http://ideas.repec.org/s/bla/jrinsu.html>) as well as the EconPapers website (located at <http://econpapers.repec.org/article/blajrinsu/>).

3. Editorial Board.

While all of the legacy manuscripts were handled directly by the Editor, those submitted through ScholarOne are assigned either to the Editor, or to one of the six Co-Editors. Each of the Co-Editors has agreed to supervise 12-14 submissions per year, which for each paper entails the assignment of reviewers and the making of a

recommendation to the Editor regarding disposition. The Co-Editors also manage any resubmissions of original manuscripts to which they were assigned.

Currently, the six Co-Editors are Richard Butler (Brigham Young University), Christian Gollier (Toulouse School of Economics), Scott Harrington (University of Pennsylvania), Greg Niehaus (University of South Carolina), Arthur Snow (University of Georgia) and Mary Weiss (Temple University). All of these Co-Editors have been exemplary in the performance of their duties, which is greatly appreciated by the Editorial Office.

The distribution of assignments for manuscripts submitted through ScholarOne is presented in the following table. Also included are the manuscripts handled by Harris Schlesinger and Richard Phillips, who were previously coeditors of the Journal.

Manuscripts by Editor: January 1, 2013 - June 30, 2017

Co-Editor	Number of Manuscripts	Percentage
Richard Butler	61	7.4%
Keith Crocker	424	51.5%
Christian Gollier	23	2.8%
Scott Harrington	60	7.3%
Greg Niehaus	22	2.7%
Richard Phillips	26	3.2%
Harris Schlesinger	22	2.7%
Arthur Snow	53	6.4%
Mary Weiss	66	8.0%
Not Assigned to Editor ³	67	8.1%

David Cather remains the Book Review Editor. The current list of editors is contained in Appendix B.

4. Manuscript Referees.

The list of the 556 reviewers that have been used for the manuscripts handled by the Editorial Office since January 1, 2013 is contained in Appendix C. This list contains reviewers of both ScholarOne manuscripts and the legacy manuscripts that were handled by the Editorial Office.

³ These are either on administrative hold in the Editorial Office awaiting additional information from the authors, or were desk rejected by the Editor-in-Chief without a co-editor assignment.

5. Submission Development.

The special issue *Longevity 10—The Tenth International Longevity Risk and Capital Markets Solutions Conference* was published in April 2017 as a one-time supplemental issue. The guest editors of this special issue were David Blake (City University of London) and Marco Morales (Universidad Diego Portales).⁴

There are two other special issues in process. The first will be entitled *Risk in Emerging Markets* and will feature papers drawn from the *Insurance Risk and Finance Research Conference* held at the Nanyang Technical University on June 25-26, 2015. The guest editors are David Cummins (Temple University) and Michael Powers (Tsinghua University), and this issue is expected to appear in 2018.

The third special issue is tentatively entitled *Choices Under Uncertainty Beyond Risk Aversion* and will be directed toward topics that are closely associated with our recently departed colleague, Harris Schlesinger. Christian Gollier (Toulouse School of Economics) and Louis Eeckhoudt (Catholic University of Mons) have agreed to serve as guest editors.

6. Mehr Award.

The Editorial Board is responsible for the selection of the Mehr Award recipient. Each year ARIA presents the Robert I. Mehr Award to the author(s) of the *JRI* article “that has best stood the test of time”. Since the articles must be at least ten years old, those papers appearing in 2007 were considered.

All the Co-editors and the Associate Editors that do not have an article in the volume under consideration are eligible to vote. On May 23, 2017 the Assistant Editor sent to all members of the selection committee a list of articles to be considered from volume 74 of the *Journal*, including the abstract, citation information, and a web link to the article in JSTOR. Each of the editors was asked to rank their top three choices. When the rankings were received in the Editorial Office, the Assistant Editor assigned each first choice 3 points, the second choices 2 points, and the third choices were given 1 point. A score was calculated for each candidate article. If there were no clear majority on the first ballot, a second ballot would have been held.

This year there was a clear majority on the first ballot. The selection committee recommended that the 2017 Robert I. Mehr Award be given to Kenneth A. Froot for

⁴ As noted in a previous report, the estimate from Wiley-Blackwell was that the cost of a one-time fifth issue would be approximately \$8182, and the guest editors covered \$5000 of this amount. The Association paid for the balance of the special issue.

his article entitled "Risk Management, Capital Budgeting, and Capital Structure Policy for Insurers and Reinsurers" (Volume 74, Number 2, June 2007)

7. Open Access and Supporting Information.

As noted in last year's report, there are two important changes to the *Journal* that have been recently implemented and which deserve to be revisited here.

The first is Open Access. While in the past, authors of papers accepted for publication were required to transfer the copyright to Wiley-Blackwell, OnlineOpen is now available to authors who wish to make their article available to non-subscribers on publication, or whose funding agency requires grantees to archive the final version of their article. This requires a fee of US\$3000 to be paid by the author, the author's funding agency, or the author's institution. Details are provided on the *Journal* web pages at

<http://journalofriskandinsurance.smeal.psu.edu/submissions/open-access>.

Open access articles are subject to the same refereeing and editorial processes as any other article. Moreover, open access articles will not displace regular articles in the *Journal* as the fees are used to cover, among other things, the cost of increasing the number of pages to accommodate the open access articles. The first open-access article published by the *Journal* appeared as the second featured article in the *Longevity 10* special issue.

The second change is that the Wiley Online Library web pages for the *Journal* now have a Supporting Information section. This appears as a link when readers view the article through the Online Library, and a citation link is inserted during production into the article's references. This permits the authors to put, for example, technical appendices or data in the Online Library so that it does not need to appear in the article and therefore economizes on journal page in the print issue. Our goal is to publish more, but shorter, articles in the *Journal* with the more esoteric details placed in the Supporting Information archive on the article's web page in the Online Library. Details can be found at

<http://journalofriskandinsurance.smeal.psu.edu/submissions/supporting-information>.

We have been aggressively pursuing this strategy, which is already reducing the length of the queue of papers that have been accepted for publication but have not yet appeared in print.

8. ScholarOne, Wiley-Blackwell, and ARIA Administrative Staff.

The main contact with the publisher Wiley-Blackwell for matters involving the management of the *Journal* is now Caroline MaCarley (cmccarle@wiley.com). She has replaced Matthew Cooper, who has moved on to the position of Senior Commercial Support Analyst in the Finance Department at Wiley. Matthew will be missed, as his assistance was instrumental in setting up the Open Access and the Supporting Information initiatives noted above. Our Production Editor remains Lou Philippe P. Manila (lpmanila@wiley.com), who has been both efficient and easy to deal with. The ScholarOne web site continues to work flawlessly, and our (mostly minor) questions are now directed to their help desk, which has been very effective.

After the papers are accepted for publication by the Editorial Office, the process of contacting the authors for proofreading and the preparation of the manuscript for publication is handled entirely by Wiley-Blackwell. Once a manuscript is ready to be displayed on Early View, the Editor is contacted to examine the last draft. After editorial approval, the manuscript is posted on-line in publication format and may be viewed through Early View at

[http://onlinelibrary.wiley.com/journal/10.1111/\(ISSN\)1539-6975/earlyview](http://onlinelibrary.wiley.com/journal/10.1111/(ISSN)1539-6975/earlyview).

Articles formally scheduled to appear in a print issue are also displayed in the Wiley Online Library prior to the print issue publication.

The primary contacts with ARIA are Tony Biacchi and Jennifer Long. We have an excellent relationship with both.

Finally, as always, a special recognition and thanks is due our Managing Assistant Editor, Lisa Ford, whose tireless dedication to the *Journal* is the reason that the Editorial Office operates so efficiently.

Keith J. Crocker, Editor
